BROADBENT GRAIN WELCOMES NSW RAIL UPGRADES

Broadbent Grain are pleased to announce the successful application in funding for up to \$2 million from the Fixing Country Rail pilot program to reinstate 2.8 km section of Moree to Inverell railway line.

Fixing Country Rail is a program to fund rail infrastructure enhancement projects that eliminate connectivity constraints on the NSW regional rail network and reduce the cost to market for regional businesses. It is designed to complement Fixing Country Roads to build an efficient freight transport network in regional NSW.

Broadbent Grain would like to thank both the Moree Plains Shire Council and the NSW government and in particular the Minister Duncan Gay for his role in promoting the major benefits of investing in regional rail infrastructure. The work will link the receival facilities of Moree-based Broadbent Grain with the main line servicing Moree.
